

Laminated Dock Bumpers

B920-11

9" x 20" x 11"

Features

Tough plies of truck tire material virtually eliminates chipping or abrasion, unlike molded rubber, extruded rubber, conveyor belting or wood plank bumpers. Attractive deep black color enhances a neat, professional architectural look. Manufactured under pressure exceeding 1,500 lbs. to absorb over 80% of impact force.

Anchor bolts are protected by at least 3" of rubber to prevent damage.

Installation

Structural mounting angles permit welded installations or provide bolting through steel

Material/Thickness

Fabric reinforced rubber pads cut from selected recycled truck tires. Rubber pads laminated between structural steel angles and secured with 3/4" steel tie rods.

Bumpers may be ordered with angles or flat plates at each end. Use a flat plate for mounting bumper next to a dock leveler, or where the space is too tight to allow the use of angles. Note: When using the flat plate, it is welded to the dock.
